Geosenic Limited / Moses Mumo agreement

Attachment

Deliverables and budget

Design Phase: 60,000ksh

- User interface (UI) design

- User experience (UX) design

- Wireframing and prototyping

- Design iterations based on feedback

Development Phase: 60,000ksh

- Frontend development: Implementing the user interface design

- Backend development: Building the core functionality, database management,

user authentication, etc.

- Content management system (CMS) development if required

- Testing environment setup

Quality Assurance (QA) and Testing: 60,000ksh

- Functional testing: Ensuring all features work as expected

- Compatibility testing: Testing across different browsers and devices

- Performance testing: Checking system performance under various loads

- Security testing: Identifying and fixing vulnerabilities

- User acceptance testing (UAT): Testing with actual users to gather feedback

Deployment: 60,000ksh

- Setting up hosting infrastructure (cloud hosting, server setup, etc.)

- Deployment of the application to production servers

- Configuration and optimization for performance and security

Training and Documentation:

- Providing training sessions for administrators and instructors on how to use the

system effectively

Maintenance and Support: (After project completion)

● Ongoing support and maintenance post-launch, including bug fixes, updates, and technical support

Contingency fee of 10,000 Ksh payable upon request to cover unexpected expenses that may occur over the course of the project.
